

POCKETSMART AI

Solution Requirements

- Functional: add, view, edit, and organize expense records (as implemented).
- Functional: display spending totals and category-wise summaries.
- Functional: allow budget configuration and budget status review.
- Functional: provide an AI assistant for contextual financial insights and recommendations.
- Non-functional: responsive interface, understandable errors, reasonable response time, secure handling of credentials, and protection of personal financial data.
- Acceptance testing should verify each feature against the actual running application.
