

POCKETSMART AI

Technology Stack

- Project: PocketSmart AI – Smart Budget & Recommendation Assistant.
- Architecture areas: frontend UI, backend/API, data persistence, and AI/LLM integration.
- The exact languages, frameworks, database, and AI provider must be copied from the source project's dependency/configuration files.
- Keep API keys in environment variables or a secrets manager; do not commit credentials.
- Include setup instructions for installing dependencies, configuring environment variables, starting services, and testing.
