

POCKETSMART AI

Solution Architecture

- Presentation layer: pages, forms, dashboard, and assistant UI.
- Application layer: validation, transaction operations, budget calculations, and request orchestration.
- Data layer: persistence for user, transaction, and budget records, according to the implemented database.
- AI integration: server-side request to configured LLM provider, response handling, and user-facing output.
- Security: keep secrets server-side, validate inputs, avoid exposing private transaction data unnecessarily, and handle API failures.
