

POCKETSMART AI

Project Planning

- Phase 1 – Ideation: define user problem, goals, and MVP scope.
- Phase 2 – Requirements: document user journey, requirements, data flow, and stack.
- Phase 3 – Design: establish UI, architecture, and data model.
- Phase 4 – Development: implement transaction, dashboard, budget, and AI assistant features.
- Phase 5 – Testing: verify core workflows, validation, error states, and AI integration.
- Phase 6 – Documentation: prepare installation, configuration, user guide, and known limitations.
- Phase 7 – Demonstration: rehearse a complete user workflow and capture screenshots/video.
- Track progress with task owners, milestones, and evidence from the actual build.
